

EduLearn Learning Platform

A self-contained HTML/CSS/JavaScript prototype is included in the repository so the interaction flow can be demonstrated directly from VS Code without package installation.

Prototype Flow

Home → Start Learning → Courses

Clickable navigation connects the major learning states in the prototype.

Courses → View Course → Course Detail

Clickable navigation connects the major learning states in the prototype.

Course Detail → Enroll & Continue → Dashboard

Clickable navigation connects the major learning states in the prototype.

Dashboard → Continue → Course Detail

Screen Inventory

Screen	Purpose	Primary Action
Home	Introduction, featured courses, categories	Start Learning
Courses	Search and browse catalog	View Course
Dashboard	Track learning progress	Continue
Login	Returning-user entry point	Login
Course modal	Quick detail and enrollment step	Enroll & Continue

How to run

Open Task-4/prototype/index.html in a browser, or open the project in VS Code and use Live Server. No framework or package installation is required.

Submission note

The official task asks for a clickable prototype in Figma/Adobe XD. This repository contains the working web prototype; if a Figma/Adobe XD version is required by the submission form, recreate these screens/interactions there and add the share link to the README.
